

We Democrats Believe in:

Global peace: We seek an end to violence by addressing its root causes: social and economic injustice.

Human Rights: We uphold the Bill of Rights and oppose all laws that threaten our civil liberties. We know that promoting democracy, human rights, and the rule of law here and abroad is vital to our long-term security.

Global Justice: We oppose bigotry, discrimination, and economic inequality based on race, ethnicity, class, gender, religion, or sexual orientation.

Government: We believe that government has an important role in supporting human needs, including jobs, health care, education, housing, transportation, environmental protection, and the arts and culture.

Reproductive Rights: We support a woman's right to choose. At the same time, we strongly support family planning and adoption incentives. Abortion should be safe, legal, and rare.

Separation of Church and State: We stand for freedom of religion in the private sphere and freedom from enforced religion in the public sphere.

We believe in An America:

that protects individual liberty and fosters community.

that offers opportunity, rewards responsibility, and rejoices in diversity.

that is strong at home and respected in the world.
